

Just Refill

Refill Instructions - Dell JF333 Cartridge

Dell

Inkjet Printer 725

All In One 810

All in One 926

All in One 966

Before refilling this cartridge make sure you have some newspaper down to absorb any potential spillage.

1. Peel off the label on top of the cartridge
2. Depending on which cartridge you are trying to fill you will see the filling holes.
fig.1 - Black Cartridge
fig.2 - Colour Cartridge
fig.3 - Photo Cartridge

3. You may have to enlarge the filling holes to allow the steel filling tube access to the cartridge. Use the drill bit provided in the kit to do this.
4. If you are filling either the Photo Cartridge or the Colour cartridge then cover the other 2 holes with a little bit of tape to prevent any contamination.
5. **SLOWLY** inject the ink into the cartridge until the sponge is full.

6. Once you have refilled the chamber the repeat with the other two chambers (The black cartridge only has one chamber).

7. Replace the label onto the cartridge

8. Insert the cartridge into the printer and run the head cleaning function.

9. For best results leave the cartridge to sit in the printer for 8 hours, or overnight, and this will allow the ink to saturate the sponge correctly.
